A briefe Declaration of the foure Quarters of this Year, 1649.

The Spring quarter becometh with us Astronomically the 10. day of March, at two a clocke, 22 min. 45. seconds in the morning; at which time the Sun entreech into the Vernall hot and dry cholerick, Quentall and Equinotiall signe Aries, making then our dayes and nightes of an equal length betwixt Sun and Sun. This quarter both resemble grow-
ing youth.

Summer quarte: Astronomically, taketh its begin-

ning the 11. day of June, 35. min. past 5. a clocke in the morning, at which time the reddeste Sun enters into the cold and moyst signe Cancer: he hath now for this yeare finished his largest and Northern progress: he maketh with us the longest dayes and shortest nights in all the yeare.

Autumne or Harbest-quarter, begins Astronomically the 12. of September, a quarter past 8. at night, at which time the regal Planet Sol entereth the 11. min. of the hot moyst and ayrie signe Libra making our second Equinoctiall of equall day and night to us Northern dwellers. This quarter doth very resemble declining age.

Winter, the first quarter Astronomically but the last according to our English account, begins the 11. day of December, at 2. a clocke in the morning, at which time the Sunn enters into the first min. of the cold and earthy signe Capricorne, being then declined from the Equinoctiall 23. degrees, 31. minutes, 30. seconds to the Southwards, at which time the dayes be at the shortest, and nights at the longest with us in England. This quarter doth naturally resemble old age.

Cautious Physicall.

Take no Physick in the Dog dayes, in the extreme heat of Summer, nor in the extreme cold of Winter, unless in dangerous diseases, as Plurisie, Apoplexie, Plegne, &c. neither let blood.

A purgation will purge the humours best, when the Moon is in Cancer, Scorpio, Pisces, with an Aspect of Venus.

It is bad purging when the Moon is in Leo. Sup not too late any time, but rise betimes in the morning, especially in the Spring and Summer. Drinke before you wash in the morning, combe your head the haire backward, it purgeth Rheume and cleareth the

Conjectures of weather by the Moone.

When the Moone doth change, be it at full or enter
into her first or full quarter in Aries, Leo, or Sagit-
tarius; in the winter it is commonly faire, but in
Summer hot, especially in June and Iuly.

If she change, be at the full, or enter into the first

Wood-house. 1649.

02 last quarter, in Taurus, Virgo, 02 Capricorn, in Winter it is likely to be cold, but in Summer temperate.

When she is at the same time in Libra, Gemini, 02 Aquarius, then look for wind, especially in the Spring 02 Harbest.

But if the Moone be at the full 02 change, 02 either quarters, in Cancer, Scorpio, 02 Pisces, in Winter judge of moist and rainie weather, and sometimes Snow, but in Summer good and temperate weather for the most part, yet sometimes it raineth then, especially when Venus is aspected with the Moone.

Signes of faire Weather.

THe Sun rising and setting cleare, the Moone also cleare 3. dayes before the full, spots appearing in a full Moone towards Sunne-set, clouds with golden edges, a cloudie white clearing against the wind, a Rain-bow appearing onely red and yellowish, a red Evening, and a gray Morning, the Crow crying sometimes in the morning, many Bats flying abroad sooner then ordinarie, a white mist rising out of meadows 02 waters, before Sun rise, 02 after Sun-set, Kites flying high in the ayre, 02 Ravens gaping against the Sun, hot weather, Sores of Eyes playing in the Sun-shine towards night, Stars seeming dark and fiery red, signifieth drought, wind, 02 both.

Signes of Raine.
